

GLAZING SYSTEMS SPECIFICATIONS MANUAL

NATIONAL VERSION
(2010)

The original manual prepared for and by the
Glazing Contractors Association of British Columbia
© 2003 by Glazing Contractors Association of British Columbia (GCABC)

Acknowledgements

The original manual was created by Al Jaugelis BSc (Arch)

With assistance from

Rudi Kevesdi – Division 8 Consulting; Gary Berkeley – Berkeley Engineering; David Hussion – DH Glass Solutions; Leonard Pianalto – Read Jones Christoffersen; GCABC Technical Committee Members

The national 2010 version was created with assistance from the following persons and companies.

Leonard Pianalto, M.Sc., P.Eng., LEED AP - Read Jones Christoffersen; Carmen Chun, EIT, LEED AP - Read Jones Christoffersen; Philip Parker, P.Eng.-Read Jones Christoffersen; Brent Harder, P.Eng., GSC - Ferguson Glass; Steve Gusterson, CTR - Alumicor Limited; John Mastrofini, P.Eng.;

Figures, tables and visuals were donated by the following companies:

Dow Corning; B3 Glass; Kawneer; Alumicor; Ferguson Glass;
Construction Specifications Canada – Technical Studies Committee

Glazing Contractors Association of British Columbia (2010 Board of Directors)

David Langton – Competition Glass; Todd Domstad – Nu Glass Projects;
Marty Nixon – National Glass; Brian Romanchuk – Flynn Canada;
Debra Dotschkat – GC Glass Canada; Zana Gordon – GCABC Executive Director

Glazing Contractor Association of British Columbia (GCABC)

Glazing Systems Specifications Manual

Disclaimer

This manual has been prepared on a voluntary basis as a guide to assist Architects and Specifiers. GCABC has made best efforts to reflect what it believes to be best practices. However the GCABC, its members, employees, contractors and agents do not assume responsibility for the liability for the accuracy or reliability of the contents of this manual. In addition, it is not the intention of the GCABC to endorse a particular service, product, supplier, manufacturer or contractor.

The GCABC accepts no responsibility for any liability which might result from the application of any information contained herein. There may be many regional differences in glazing practices, engineering design practices as well as local Codes and By-laws of which the members of the GCABC are not aware. As new editions of the National Building Code come into effect any potential effects on glazing practice may not be fully incorporated into this edition of the manual.

Table of Contents	p.3
Preamble	p.5
GUIDELINES	
1	Introduction
.1	A Brief Introduction to Glass and Glazing p.9
.2	History and Overview of Glazing in Canada p.11
.3	Interprovincial Standards Red Seal Program: Glazier (trade certification)..... p.15
2	Design
.1	Introduction p.17
.2	Architectural Considerations..... p.19
.3	Glazing System Overview and Product Selection p.29
.4	Building Codes & By-Laws p.33
.5	Structural and Safety Aspects p.39
.1	Glass Design to Human Impact..... p.51
.2	Glass Guards and Balustrades p.57
.6	Building Envelope Design p.61
.7	Sustainability and Energy Use Rating Systems p.71
.8	Sealants p.77
.9	Preparation of Shop Drawings p.85
3	Testing
.1	Introduction p.89
.2	Performance Evaluation and Validation p.91
4	Installation
.1	Responsibility for Quality and Performance..... p.111
.2	Coordination and Tolerances p.115
.3	Assembly Methods..... p.119
.4	Glass Care and Maintenance p.135
COMMENTARIES	
08 41 13	Aluminum Framed Entrances and Storefront..... 145
08 44 13	Glazed Aluminum Curtain Walls 159
08 44 26	Structural Glazing 175
08 50 10	Combustible Windows..... 193
08 51 13	Aluminum Windows 197
08 60 00	Roof Windows and Skylights 211
08 80 00a	Glass and Glazing 235
08 80 00a	Glass and Glazing Standards 277
SPECIFICATIONS	
07 90 00	Sealant 303
07 92 43	Silicone Building Sealant..... 321
08 02 10	Glass Cleaning and Maintenance..... 339
08 41 13	Aluminum Framed Entrances and Storefront..... 341
08 44 13	Glazed Aluminum Curtain Walls 365
08 44 26	Structural Glazing 395
08 51 13	Aluminum Windows..... 411
08 50 13	Combustible Windows..... 445
08 60 60	Roof Windows and Skylights 473
08 80 00	Glass and Glazing 505
APPENDICES	
A.	Glossary 528
B.	Reference Documents 551

Figure 2: Typical Curb Mounted Skylight Isometric	p. 233
08 80 00 Glass and Glazing	
Figure 1: Typical Insulated Unit.....	p. 276

PREAMBLE

The Glazing Specifications Manual is intended to reflect all aspects of the practice of glazing in Canada. Users of the manual may belong to one of the following:

- Students and apprentices
- Glaziers and related trade disciplines
- Suppliers and manufacturers
- General contractors and developers
- Engineers, architects and specifiers

There are many facets to the glazing industry as such the subject matter covered in this manual is broad. In an attempt to organize the material into a meaningful and useful manner this document has been structured into three distinct sections as depicted in the diagram below:

The progression of the text is meant to span the information spectrum from general to specific. There is a broad discussion on design issues that leads into a series of relevant construction document specifications formatted to the 2005 (2010 Update) National Master Specifications (NMS) master format. The *Guidelines* section should serve as a textbook or a reference document that covers general knowledge and the basics of glazing for students and apprentices. The *Commentary* section is intended to be a companion to the *Specifications*, to provide further discussion on specific issues; these sections are written for engineers, architects, and specifiers.

A glossary of terms and a complete list of standards and codes referenced in this manual can be found in the appendix.
