

HIGH PERFORMANCE WINDOW CERTIFICATION PROGRAM (HPWCP)
APPLICATION FORM

Please note the following before completing this application:

- Thoroughly review the HPWCP Program Guide available here [[link](#)] before completing this application form.
- All applications are treated on a first come first served basis. Each application will be marked with date and time they were received.

Please indicate which category you are applying for.

If you want to apply for both please complete separate form for each application. Please indicate on the line below

ENERGY STAR Most Efficient certification: \$25,000

Passive House certification: \$40,000

1 application only

1 of 2 application

2 of 2 application

Proponents can receive up to two awards during the term of the Program, one award under each eligible product certification for a total possible award of \$65,000, or two awards under one eligible product certification for a total of \$50,000 (ENERGY STAR) or \$80,000 (Passive House).

However, a new and different product line is required for each award.

of applications Single application 1 of 2 applications

To be an eligible applicant one of the following boxes **MUST** be checked

- A company that manufactures the subject window product or product line in BC.
- A consortium of manufacturers that apply as a group, sharing a single fenestration product (or product line), that manufacture the subject product or product line in BC. (partnership documentation is required)

Provide direction or comments on any attachments from this section.

Eligible projects encompass a new window product or product line that as of March 6, 2017 or after is certified as:

- Certified as ENERGY STAR Most Efficient (Notification from NRCan demonstrating ENERGY STAR Most Efficient along with evidence that the new eligible windows products are listed online in the NRCan database)

Or

(Note: if you are applying for both levels of funding, please use a separate application. Indicate in your comments that you have two applications)

- Notification and a report from the Passive House Institute (Germany), demonstrating Passive House Certification.

And

- SCC accredited-test centre reports on CSA 440.2/NRFC 100 testing
- SCC-accredited test centre reports on NAFS-08 testing
